

COLLEZIONE MOSAICO

The Mosaico collection interprets glass by an elegant and unusual use of the Bisazza Mosaic. These light fixtures emphasize the nobility and exalt the colours, transparencies and the tactile qualities of this ancient material. These absolutely rigorous objects are based on a constant revisiting of the shape of the tesseras, the square as a transcendental quintessence. The purity of form is the ideal condition to exalt the characteristics of the material being used, properties that best distinguish the Oltremondano production.
