

COLLEZIONE NINFEE

The "Ninfee" Collection is a continuous relationship between opposites. Oltremondano has explored the sculptural quality of the materials used. The "Ninfee" lamps are flowers that emphasize the creative dialogue between light and shadow; lamps, and at the same time, sculptures; blades of light, and at the same time, petals that shape the empty space. All flowers are hand-folded, making every piece unique in itself. The gold leaf is applied with patient and skilled hand craftsmanship; the precious material and the delicacy of the workmanship combine to give "Ninfee" lamps their evocative charm.
