

COLLEZIONE STELO

The Stelo Collection is inspired by the concept of asceticism. The bodies, based exclusively on circular forms, are columns of light traced in space. The diffusers are characterized by different finishes obtained from skilful hand craftsmanship. Unique pieces, elegant when switched off, are unpredictable in the transformations of the materials when turned on. The union of technology and craftsmanship gives rise to extremely versatile lighting fixtures.

COLLEZIONE STELO
STELO CASCATA

STELO CASCATA

Hanging lamp composed of a varying number of diffusers (Ø cm 6,5) with fluorescent lamps and electronic ballasts.

The models shown are examples. This lamp can be custom-made:

Number of diffusers: 3 or more

Length of diffusers: from 30 cm to 160 cm

6 different diffuser finishings

Fluorescent lamps: from 18W to 58W

Cable length on request (max 220 cm)

Painted aluminium frame

Polycarbonate diffusers (see page 13):

satin opal: SCA ... FOG

hand-ground: SCA ... ICE

needle etched metallized: SCA ... MET

covered with hand-made paper: Nut: SCA ... PN / Tea: SCA ... PT

Example shown in the above photo:

STELO CASCATA 5x24W-C composed of:

Painted aluminium frame Ø 34 - H 4,5 cm

5 diffusers (Ø 6,5 cm - H 39 cm each), 5 electronic ballasts

and 5 compact fluorescent lamps 24W 2G11/TC-L

The total length of the lamp is 120 cm

Different lengths can be obtained with different measures of the single cables.

Example shown in the photo on the left:

STELO CASCATA 14x58W composed of:

Painted aluminium frame 50 x 50 x 5 cm

14 diffusers (Ø 6,5 cm - H 160 cm each), 14 electronic ballasts

and 14 linear fluorescent lamps T8 58W

The total length of the lamp is 380 cm

Different lengths can be obtained with different measures of the single cables.

Polycarbonate covered with hand-made paper

TO CHOOSE THE RIGHT SHADE OF WHITE SEE PAGE 32

WHITE COMES IN DIFFERENT SHADES

Fluorescent lamps are available in different shades of white (CCT). Choosing the shade of the lamp is a matter of personal taste, individual perception and local preference, as well as a question of the atmosphere to be created. People in northern countries prefer warm white, while people in southern countries tend to choose cool white.

With polycarbonate, metallized or white paper diffusers we generally recommend a cool white lamp - 840 (CCT 4000 K); with the tea or nut paper diffusers we generally recommend a warm white lamp - 830 (CCT 3000 K) or extra warm white - 827 (CCT 2700 K).

PLEASE SPECIFY THE CODE WITH YOUR ORDER

All Oltremondano lamps are made entirely in Italy.

For all products: due to the hand craftsmanship of the diffusers, finishing and colours can undergo slight variations. Any small imperfections in the surfaces adds uniqueness and value to our diffusers. It is not possible to guarantee the availability of a perfect regularity and an identical tone for subsequent orders.

The sizes given in the "Ninfee" Collection are approximate due to the hand-folding of the diffusers.

Oltremondano reserves the right to change, at any time and without prior warning, prices and technical specifications of any product.
