

FORMA 0.1.2.3

Technical specifications

Forma 0 and **Forma 1** are square-shaped luminaires. The former size is 90 x 90 mm, the latter size is 150 x 150 mm, with a depth of 90 mm and 60W and 1000W halogen lamps.

Forma 2, a rectangular luminaire, 100 x 240 mm, with depth 103 mm and one 100W halogen lamp or 26W fluorescent lamp.

Forma 3, is the largest type: 100 x 640 mm, with depth 150 mm and one 55W fluorescent lamp.

All luminaires support single or double (upper and lower) light emission and feature front sandblasted glass diffusers.

Three finishing colours are available: white, grey and chromium-plated.

With Forma, the double (upper, lower or both) light emission wall-washer family, Quattrobi widens its product offer of luminaires characterised by essential shapes and clean geometry.

The main feature of these luminaires is the ability to fit in any environment without affecting existing furnishing and structural elements, while focusing on high functionality, rather than shaping and decoration. Suitable for indoor lighting, this luminaire series offers different dimensions and finishing, can be equipped with halogen or fluorescent lamps and provides easy installation thanks to its purposely designed system.

What is particularly interesting is that the luminaire provides simple and easy installation.

After mounting the base (including the electrical ballast) to the wall, it is secured to the louver through a special hook system ensuring a tight and strong fit.

This way, no closing screws can be seen that may alter the appearance of the luminaire and to disinstall it, you simply pull the front housing.

Optical components and light sources

These luminaires use mains voltage halogen or fluorescent lamps. Forma 0 uses a 50W halogen lamp with G4 connection; Forma 1 uses a max 100W halogen lamp with R7s connection; Forma 2 uses a max 100W with R7s connection or a 26W fluorescent lamp with G24d-3 connection; Forma 3 uses a 80W fluorescent lamp with 2G11 connection.

MAINS VOLTAGE HALOGEN LAMPS

	HDG - R7s - 74,9 mm	max 100W
	HS - 12V - G4	max 20W

FLUORESCENT LAMPS

	FSQ (TC-D) - G24q-3	26W
	FSDH (TC-L) - 2G11	80W

Structural features

Installation: wall-mounted, single or double light emission

Luminaire housing: coated steel sheet

Wall fitting: coated steel sheet

Louver: sand-blasted tempered glass

Light sources: mains voltage halogen, fluorescent lamps

Standard finishing: white, grey, chromium-plated, copper

Protection class: IP40

Insulation class: I (⊕)

Power supply: 230V - 50Hz

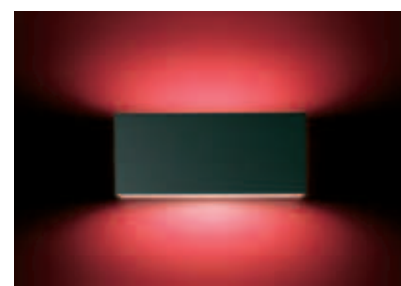

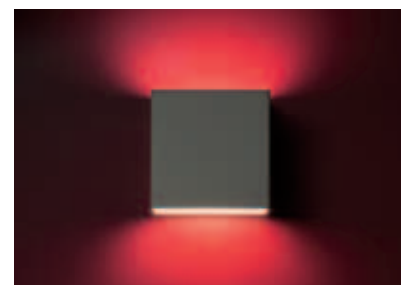

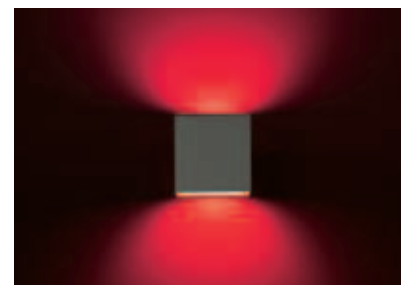

The special hook system allows to fit the lamp housing to the wall plate by applying a light pressure. This new system makes all louver mounting, luminaire maintenance and technical assistance operations easier.

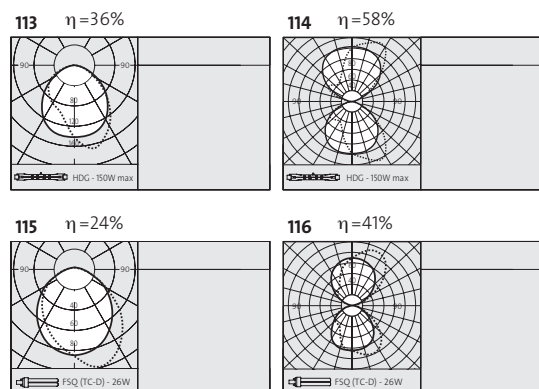

Forma, wall-washer with single or double light emission, has a clean and rigorous profile, designed by Stefano Dall'Osso.

Fixed wall-washer luminaire for mains voltage halogen lamps or compact fluorescent lamp.
Single and double light emission.
Sand-blasted tempered glass diffusers.
