

**Chone FV**

The 8 hour a day and 365 days a year continuous functioning of the fitting is guaranteed only on condition of maximum solar exposure of at least 4 hours a day.

Thanks to an oversized photovoltaic panel and the intelligent management of the supply of battery charge, 4 lighting ups are guaranteed even in the total absence of solar exposure.

It is obvious though, that the respect of the above parameters is influenced greatly by the positioning of the fitting, the quantity and quality of the solar exposure and the ambient temperature.

**Outdoor light fitting**

Photovoltaic light fitting  
for use on pole top Ø 60 mm poles

Safety against electrical shocks  
No electricity costs  
No black outs

**Colour**

Metallic grey / Black / Green

**Technical details**

- Reinforced thermoplastic base
- Led white 3 x 1W cold light
- Electronic board for the computer management of on/off of fitting and charge/discharge of batteries
- Batteries Ni-Mh 3,6V 2,8Ah
- Clear acrylic diffuser, prismatic inside
- Reinforced thermoplastic cap with integrated 4W monocristalline silicium photovoltaic panel
- Stainless steel screws

**Suitable for**

Pedestrian areas, alleys, private gardens

**Special features**

The fitting turns on 15 minutes after sunset, with 8 hours of continuous functioning, turning off automatically thanks to incorporated timer  
Total recharging time (when batteries are completely discharged), with maximum solar exposure, 18 hours  
Total discharging time (when batteries are completely charged), without solar exposure, 4 lighting ups  
Totally energy saving
